

APPLICATIONS

General Offices, Call Centres, Dealing Rooms, Air Plenum Situations and many more.

Galvanised Steel Sheet top and bottom

PVC Edging

www.bathgateflooring.co.uk

PANEL DESCRIPTION

The BGF-BSEN panel is a sandwich construction of galvanised steel sheets to the top and bottom enclosing a high density particleboard core. The edge is then wrapped with a PVC trim to create a fully encapsulated 600mm x 600mm panel. This product is ideally suited to allow a huge range of finished products to be bonded to it; these include carpet, vinyl, HPL, wood and stones.

MANUFACTURE

The panel is manufactured in a brand new facility in Hereford that offers the customer total flexibility whilst maintaining the highest quality standard. Bathgate Flooring Ltd prides themselves on their ability to meet the customer's demands and this facility has been designed and built to meet those demands.

TECHNICAL DETAILS

BSEN 12825 classification	Panel Type	Ultimate load	Load over 300mm x 300mm	UDL
