

APPLICATIONS

General Offices, Computer Rooms, Equipment and Control Rooms, Print Rooms, Data Centres, Call Centres, Dealing Rooms, Air Plenum Situations and many more.

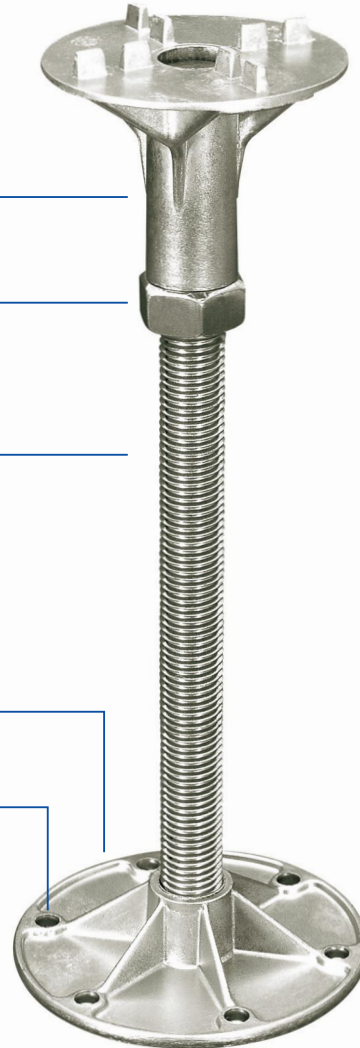

Die-cast Aluminium Head

Levelling Nut

Threaded Steel Column

Die-cast Aluminium Base with Optional Earthing Stud

Pre-cast Holes for optional mechanical fixing to slab

**HEAD**

Aluminium die-casting suitable for use with or without stringers. Eight integral upstands ensure that the panels are aligned and retained in position and yet are instantly removable with the Bathgate Panel Lifter. The head is a close fit over the M20 threaded stud and has 50mm of vertical adjustment to accommodate sub-floor tolerances. After adjustment it is secured with adhesive.

LEVELLING NUT

Steel nut for fine adjustment of the head to the correct finished floor height. After levelling, the nut is fixed with adhesive.

THREADED STEEL COLUMN

M20 threaded steel bar which is electro plated and cut to a suitable length. A PVC sleeve is available for cable protection.

BASE

Aluminium die-casting, 114mm diameter, with webs to reinforce the central boss which houses the threaded column. Pre-cast holes are incorporated to facilitate mechanical fixing if required. Earthing studs may also be pre-fitted.

STRINGER

Optional. Galvanised steel channel with slotted ends to locate over the upstands on the pedestal head. Stringers can be fixed to the head if required for lateral stability. Available in various gauges of steel to be selected according to application.

ACCESSORIES

A full range of complimentary products and accessories are available to complete the installation.

OPTIONAL ACCESSORIES

PEDESTAL CAP

STRINGER

PANEL LIFTER
